STEP 1:

Fill container with product to the required volume or level (recommended minimum number of tested containers: 5).

STEP 2:

Seal the container with the vented cap under the normal manufacturing conditions (e.g. temperature, pressure).

STEP 3:

Turn the container upside down for 15 minutes. Make sure that the cap with the integrated vent is fully covered with the product.

STEP 4:

Put the container back into the upright position. Please check the cap and vent hole for any leaks.

YES: The cause needs to be identified. Please contact your container manufacturer or distributor.

NO: Please move forward with step 5.

STEP 5:

Keep the container in the upright position. Please ensure that there is no contact between the product and the cap.

STEP 6:

Expose the container to the expected temperatures during transportation and storage for 2–3 weeks. Please observe if the containers see any distortion (bloated or collapsed).
